

# SUBWOOFERS

PLAY PRODUCTIONS LLC  
x DJ ARIA

## EXPERIENCE THE MUSIC

Feel the beat of every song with high-output subwoofers designed to reproduce bass. Adding a subwoofer livens the party for your guests on the dancefloor. Elevate the music experience by including a subwoofer.

## PROFESSIONAL GRADE

18-inch drivers powered by a 2,500 watt peak output amplifier in custom 15mm imported birchwood enclosures provide unparalleled low end reproduction to cover increased attendance and large venues.

## INCREASED VOLUME

High quality subwoofers handle lower frequencies (<80Hz) and take the heavy workload out of the main PA speakers. As a result, sound output is increased without being harsh to the ear.

## ACOUSTIC VERSATILITY

Using subwoofers for low-end reproduction allows PA speakers to be positioned in ways that transmit sound throughout the entire venue. Improved acoustics also provide a better listening experience for your guests.
